

## General Guidelines for Citing STAT!Ref

### Bibliographic Citations

Citations for use in research papers can be generated by using the Bibliographic Citations feature at the bottom of every STAT!Ref document. You can export citations suitable for use in either RefWorks or EndNote.

A screenshot of the STAT!Ref interface. At the top, there is a navigation bar with icons for 'Download Citations' (circled in red), 'Favorites', 'Result', 'Match', 'Font', and a search icon. Below this is a 'Bibliographic Citations' dialog box. It contains the text 'Export a citation for this title:' followed by a dropdown menu set to 'Download RefWorks Citation File' and a 'Get Citation' button. Below that, it says 'Or highlight and copy (Ctrl-C) the plain text citation below' followed by a citation: '2009. Jablonski's Dictionary of Medical Acronyms &amp; Abbreviations - 6th Ed. Philadelphia, PA. Saunders/Elsevier. ISBN 1-41605-899-0, ISBN 978-1-4160-5899-1. At the bottom of the dialog, it shows 'L-ASP L-asparaginase'.

## **AMA Manual of Style**

For eBooks, the format is the same as the print book plus additional information at the end of the reference indicating the location of the material. For other eBook variations, such as a book chapter, follow the format for the print version and just add the URL and accessed date at the end.

### **Example:**

Author. Title of book. Volume number and volume title [if applicable]. Edition number [if applicable]. Place of publication. Publisher. Year of Publication. URL (<https://online.statref.com/xxxxxxxx>). Date of access.
