<b>Short resource description</b>	The new BMJ Best Practice Comorbidities tool supports the management of the whole patient by offering guidance on the treatment of acute conditions alongside pre-existing comorbidities. Select from a range of common comorbidities to instantly generate a management plan tailored to the unique needs of your patient.
<b>Types of access available</b>	On-site, off-site and via the app
<b>Access instructions</b>	The Comorbidities tool is available in selected acute topics of the BMJ Best Practice website and app. Look out for the pink C+ symbol next to the Treatment Algorithm section within topics, and click on this to automatically launch the tool. You can view a list of all acute topics featuring the tool from the blue <a href="#">Comorbidities icon</a> on the website home page, or from the app home screen.
